---

Hi Vince,

Hope all is well. I would like to either have a phone conference or a meeting in Waco to discuss the GW sampling schedule at the WCR 112 Site. I need to try to figure out if I need to put together a FSP for the anion exchange systems at the site and any additional wells. Basically, I was not sure if you will be sampling the systems for breakthrough. I just want to make a plan and move forward for the time being. Would you be available in September to discuss these items in person? Also, let me know if you need anything with the site.

Sincerely,  
Dani
